

SAFETY:

Baby Cubes™ are made of a non toxic Polypropylene Virgin raw material. Recycled Polypropylene is never used in the fabrication of The Baby Cubes, so that we may be certain of the highest quality.

Baby Cubes™ contain no Bisphenol-A (BPA) Phthalates, PVC or Lead.

Manufactured in Brazil by an ISO 9001 certified factory that is WalMart approved. WalMart has some of the strictest quality control departments in the Americas and all products sold in their stores are carefully selected for reliability and consumer safety.

SAFETY/TOXICOLOGY:

Polypropylene plastics are basically inactive materials that do not present a health hazard to the consumer in either handling the plastics or, when consuming foods that the plastic has come into contact with.

All polypropylene plastics and packaging that come into direct contact with foods and beverages comply fully with the safety requirements of the CPSC (Children's Product Safety Commission) in the USA. Baby Cubes™ comply with all of the relevant European Directives on food-contact using plastic materials.

Baby Cubes™ are manufactured under the strict supervision of the ILSI Europe Packaging Material Task Force.
