Safer Solutions for Babies and Moms with New “Green” Maternity and Baby Skin Care Products

(February, 2008) Los Angeles, California – Each day more and more small businesses and companies are going “Green”. Juvenile Solutions, based in Van Nuys, California--manufacturer, distributor, importer and exporter of infant products—introduces their latest acquisition, Dermasense™ Health Care Products. This eco-friendly maternity and baby skin care line has been added to their diverse and unique products that mothers and caregivers use daily to care for their infants and toddlers.

Ms. Neckameyer, President of Juvenile Solutions, who has been in the infant specialty industry since 1999, suggests that the days of the less expensive, perfumed baby cosmetic products are fast coming to an end.

“The one or two manufacturers that have monopolized the baby cosmetic market for years are now being challenged by smaller entrepreneurial companies manufacturing eco-friendly products,” says Neckameyer.

In addition, the consumer is becoming more educated about safer and healthier products for their families. They are willing to pay a higher price for superior products such as Dermasense™ which manufactures Natural & Organic, Maternity, and Baby Skin Care products. The line is developed by a Naturopath, Herbalist and Pharmacist, and all products are hypoallergenic, free from animal and harsh chemicals such as Parabens, Perfumes, SLS & SLES.

Manufactured in Canada, the complete range of Dermasense™ Maternity and Baby Products is scientifically formulated with clinically tested ingredients that deliver therapeutic results. The Dermasense™ products are pure, safe and effective for mothers-to-be and babies.

The Canadian brand was launched in the US in January, 2008, and is now sold by industry related websites, childrens specialty stores and lactation stores.
