The Wean Machine™ Fill, Squeeze and Feed Baby anywhere at anytime!

(July, 2008) Juvenile Solutions, Van Nuys, California, has secured the rights as the North American distributor for a new clever feeding device that will make busy parents and caregivers lives easier. It is called the Wean Machine™ and is the brain child of a busy working Mom from the UK.

“I was looking for something that could help me quickly make nutritious and healthy food for my son – but, other than large electric blenders, there was nothing, certainly nothing that could be used outside of the home”, states inventor Tilly Beazeley, “and so came the idea of the Wean Machine™”.

I needed something that could puree anything from half of a banana to a selection of food from my own plate, without the fuss of setting up a blender, or the potential mess of mashing with a fork, something that I could use if I was out for lunch just as easily as if I were at home cooking for the family.”

One of the many benefits of the Wean Machine™ is that parents know exactly what is going into a baby’s food - it’s ideal for use with soft fruits and cooked vegetables – and it can produce foods suitable for children at all weaning stages, so they may eat foods that the rest of the family are eating, all that is needed to do is chop, squeeze and feed, there is no noise, no mess, and no fuss.

“We’re very excited to be working with Juvenile Solutions states Ms. Beazeley, and we’re sure parents will find the Wean Machine™ genuinely useful and fun to use.”

Manufactured by Jackson Beazeley Ltd the Wean Machine has many benefits:

- Helps through each stage of weaning
- Easy to use – fill, squeeze and feed
- Saves time, no need to cook separate meals
- Portable, compact and self contained, has a Silicone tipped spoon attached
- Fits in all leading sterilizers
- Dishwasher safe
- Eco friendly, contains no BPA’s, Phthalates or PVC
- Complies with all US and International safety standards

Juvenile Solutions in business since 1999, offers unique, innovative, safe and environmentally friendly products that can be used in the every day care of infants and toddlers. The Wean Machine™ will be launched at the ABC trade show at the Las Vegas Convention Center, September, 7-11th Booth #213.
